Meet Panda, Ice Bear, and Grizz!

Our main characters come from the popular Cartoon Network original show "We Bare Bears". These three brothers are constantly on some sort of adventure, either looking for food, making friends, or trying to become internet famous. This is why we chose them as our main characters.

Hi..

Grizz, Panda, and Ice Bears' Mechanics

Core Mechanics:

- **Running** – A core part of our game is the ability for our characters to run across the map. Using the 'A' and 'D keys on the keyboard, our bear trio will be able to traverse through our game.

- **Jumping** – We are also implementing a jump function so our bears can jump to and from platforms and avoid falling down pits! You will be able to use the Spacebar on your keyboard to jump.

- **Attacking** – Our bears will wield the Diamond Sword to defeat their enemies, which we will discuss a bit later.

- **Dialog** - Our bears will be able to converse with the locals in Level 1.

Level 1

In our first level, we will travel through four different biomes as we search for the sacred Windows 9 operating system! Our bears will start in the tundra and make their way through the jungle, desert, and eventually end up in the grasslands where Pewdiepie's home is located. If they are unable to find the OS on their journey, the must cross into the nether realm and continue their search there.

Level Specifics:
    Level inspired by Pewdiepie's Minecraft series and Minecraft itself.
    NPC: Joergen/Joergen#2/Ikea Bird/Mushroom Cow/Sven/Water Sheep
    Items: Gfuel, Demonetization Coins

The Nether

Once you pass through the Nether portal your real journey begins. Navigate your way through the Nether fighting off Ghasts, Zombie Pigmen, and Wither Skeletons. Find items along the way that may help you or hinder you. Just when you think you've won the game after finding that sweet sweet Windows 9 operating system, Pewdiepie comes in and stops you from taking it. Fight and defeat him for it and gain your internet fame, or walk away empty handed.

```
Level Specifics:
    Level and enemies based on the Nether from Minecraft.
    Enemies: Ghast, Zombie Pigman, Wither Skeleton
    Items: Strength, Speed, Slow, Poison, Demonetization Coins
```
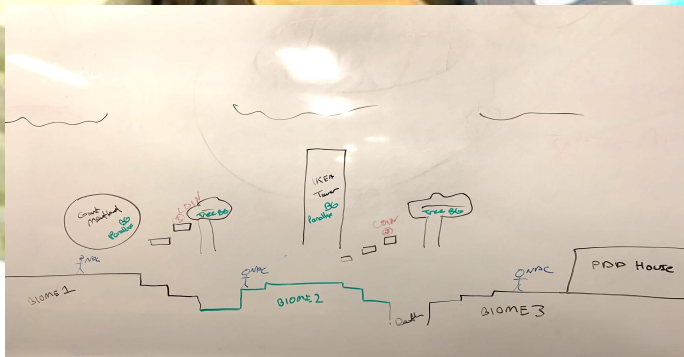

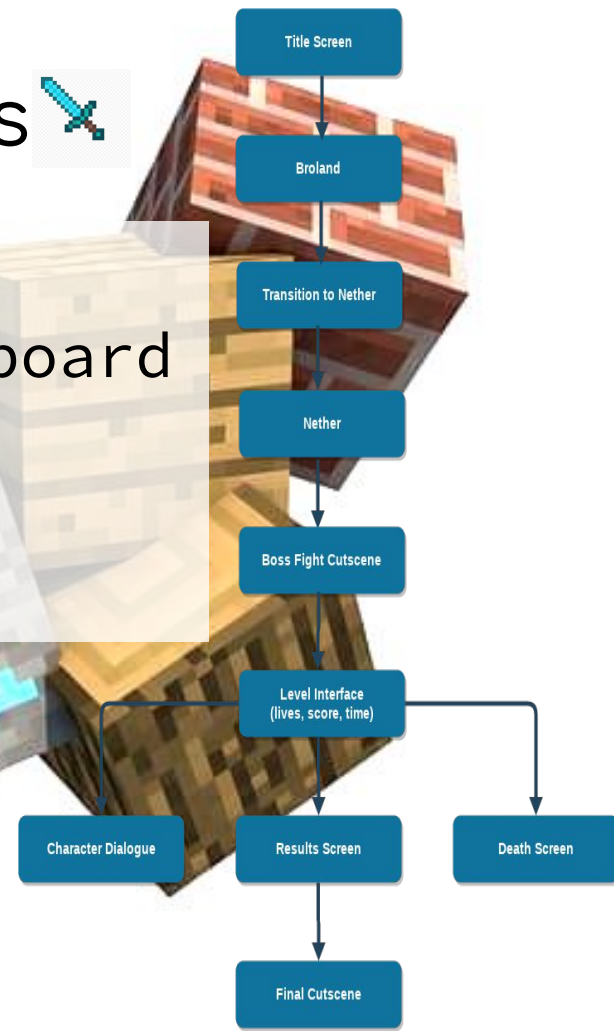

Game Mechanics ⚔️

Core Mechanics:
  Moving: 'A' & 'D' on the Keyboard
 Jumping: Spacebar
  Attacking: Left Mouse Click
  Dialog: 'W' 💬 Hi

Zombie Pigman:

Wither Skeleton:

End Game

The technical goal of our game is for you to find the rarest operating system of all, Windows 9 and gain some internet game. At the end of the game, once you obtain the almighty OS, the game ends and your points are calculated. Your score is calculated by the number of enemies you've defeated. However, the true goal of our game is for everyone to have fun and enjoy a laid back game.

Inspiration

- Super Mario World is a 2D platformer game that we all enjoyed as children, and enjoy today.
- Minecraft, since that's what the game is based on.
- Terraria because it's a 2D version of Minecraft...kind of, and so it can help give us an idea of how to setup our side scroller.
- Undertale gave us an idea on how we wanted to go about our dialogs with the NPCs in the first level.
